Mr. John C. Fuhr
Paratherm Corporation
1050 Colwell Lane
Conshohocken, PA 19428

Dear Mr. Fuhr:

This is in reply to your request for compound authorization received on January 17, 1989 for your product Paratherm NF.

This product is acceptable as a lubricant with incidental food contact for use in official establishments operating under the Federal meat and poultry products inspection program. Such compounds may be used as lubricants or anti-rust films on equipment and machine parts in locations in which there is exposure of the lubricated parts to edible products. They may also be used as a release agent on gaskets or seals of tank closures. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as anti-rust films, the compounds must be removed from the equipment surface by washing or wiping as required to leave the surface effectively free of any substance which could be transferred to food being processed.

Acceptance of compounds by this Department is in no way to be construed as an endorsement of the compounds or of any claims made for them.

If any change is made in the labeling information or formulation, the authorization for use in official plants becomes void immediately.

Sincerely,

Charles R. Edwards

Charles R. Edwards, Chief
Product Safety Branch
Food Ingredient Assessment Division

Paratherm NF

Hi, P1

00001

Dear Mr. Fuhr:

This is in reply to your request for compound authorization received on January 17, 1989 for your product Paratherm NF.

This product is chemically acceptable for use as a heat transfer fluid in official establishments operating under the Federal meat and poultry products inspection program. The compound must be used in a manner which prevents direct or indirect contamination of edible products.

The final granting of authorization for the proposed use of such compounds is the responsibility of the inspector in charge of the official plant. Technical assistance will be provided by the Product Safety Branch upon request.

Acceptance of this compound will be indicated in the "List of Proprietary Substances and Nonfood Compounds." However, the acceptable use(s) stated above will not be indicated. Copies of this letter must be supplied to Federal inspectors as proof of the acceptable use(s) of the compound.

Acceptance of compounds by this Department is in no way to be construed as an endorsement of the compounds or of any claims made for them.

If any change is made in the labeling information or formulation, the authorization for use in official plants becomes void immediately.

Sincerely,

Charles R. Edwards
